

## **Preface**

This special issue contains nine articles on 'Care & Health Care', the theme of last year's annual symposium. The tenth article is a 'teaser' for the upcoming symposium on 'Ethics, Health Care and Anthropology' on the 10th December of this year. A call for papers can be found in the News section. The issue concludes with book reviews and a new section highlighting PhD dissertations in the field of medical anthropology that were defended at Dutch and Belgium universities.
